PROFESSIONAL PROFILE

Software Engineer specialized in Java/Spring Boot and Angular, with hands-on experience building Full Stack applications, REST APIs, secure backend services and containerized deployments. Engineering background complemented by practical experience in Docker, Kubernetes, CI/CD, PostgreSQL/MySQL, Spring Security and distributed application patterns. Strong business understanding gained through finance, microfinance, commercial operations and team management, with the ability to translate operational needs into reliable digital solutions.

TECHNICAL SKILLS

Java & Backend: Java 21, Spring Boot, Spring Security, JPA/Hibernate, REST APIs, JWT, Microservices, Spring Cloud, API Gateway, Kafka, Resilience4j

Frontend: Angular, TypeScript, JavaScript, HTML/CSS

DevOps & Cloud: Git/GitHub, Docker, Docker Compose, Kubernetes/k3s, Helm, GitHub Actions, Jenkins, SonarQube/SonarCloud, Linux, AWS, Azure fundamentals

Databases & Data: PostgreSQL, MySQL, MongoDB, SQL, Python

AI / GenAI: Spring AI, LLM, RAG, PGVector, Google Gemini, Ollama, DeepSeek local, PyTorch, TensorFlow, TorchScript, DJL

Testing & Quality: JUnit, Mockito, Cucumber, functional testing, UAT, debugging, anomaly tracking

FULL STACK & SOFTWARE ENGINEERING EXPERIENCE

Full Stack Contributor

ChicColor, Tunis | Mar 2025 - Present

- Analyzed business processes and user needs, formalized workflows, business rules, User Stories and acceptance criteria for internal digital solutions.
- Contributed to the design and Full Stack development of an internal application for tracking goods, drivers/delivery staff, deliveries and payments using Java/Spring Boot, Angular and a relational database.
- Handled debugging, corrective and evolutionary maintenance, functional testing, deployment follow-up and first-level application support.
- Containerized and deployed locally with Docker and Kubernetes; monitored services, containers and pods and supported deployment troubleshooting.

Full Stack Java / Angular Developer - Final-Year Engineering Project

Mediterranean School of Business (MSB), Tunis | Jan 2026 - Jul 2026

- Designed and developed a centralized monitoring platform with Java/Spring Boot backend, Angular frontend, REST APIs and PostgreSQL.
- Implemented application security using Keycloak, JWT and RBAC, plus real-time communication with WebSocket/STOMP.
- Integrated Zabbix/SNMP monitoring, Docker containerization, GitHub Actions CI/CD, SonarCloud quality checks and Kubernetes/k3s deployment.
- Developed an ML severity-prediction module using Python/PyTorch, TorchScript and DJL; contributed to testing, documentation and Agile delivery.

Java / Angular Developer Intern

L.S. Informatique et Securite, Tunis | Aug 2025

- Developed a supplier/user management application with Spring Boot, Angular, MySQL and Docker, including CRUD, authentication, dashboard, PDF/Excel exports and email notifications.

Java Backend Developer Intern

EliteTech, Tunis | Jul 2025

- Built an administration platform with REST APIs, JWT authentication, JPA/Hibernate persistence, pagination, role/user management and functional testing.

SELECTED TECHNICAL PROJECTS

Spring AI Multi-Module Platform

- Built a GenAI platform featuring LLM chat, RAG, streaming responses, structured output and vector search.

Tech: Java, Spring AI, Angular, PostgreSQL, PGVector, Docker

Digital Bank Microservices

- Designed a distributed banking architecture composed of six services with service discovery, centralized routing, asynchronous messaging and resilience patterns.

Tech: Spring Boot, Eureka, Consul, API Gateway, Kafka, Circuit Breaker, JWT, Docker Compose

CIFAR-10 Prediction Application

- Integrated a CNN image-classification model into a web application and exposed prediction capabilities through APIs.

Tech: Python, PyTorch, FastAPI/Flask, TorchScript, Spring Boot, Angular

PREVIOUS PROFESSIONAL EXPERIENCE

IT & Application Support / Functional Support

Zitouna Tamkeen, Tunis | Mar 2024 - Mar 2025

- Provided functional and application support on the Abacus business system, qualified incidents and user requests in GLPI, coordinated resolution/escalation, and contributed to CRM evolution, testing and user support.

Microcred Tunisie | Sep 2015 - Feb 2024

Internal progression: Portfolio Manager -> Team Supervisor / Deputy Branch Manager -> Branch Manager

- Managed teams, commercial performance, KPIs, client portfolios, credit/risk activities and operational priorities; used Temenos T24 and supported users in business processes.

EDUCATION

Engineering Degree in Software Engineering and Information Systems - iTeam University | 2026

Applied Degree in Computer Science, Information Systems and Software - Higher Institute of Computer Science (ISI), Tunis El Manar University | 2013

BTS in Commerce - Gammarth Sectoral Training Center for Commerce Professions | 2015

Training:

Java OCA/OCP (2024)

Full Stack Spring Boot / Angular / DevOps (SIP Academy, 2024)

DevOps / CKAD (2025)

Python Intermediate (DataCamp, 2026)

Power BI & Microsoft Fabric (2026)

AWS AI / GenAI / Prompt Engineering (2026)
